Pick and Choose eBook Collections

Want great eBook content? Don't want an entire collection? Just the titles your library really needs? **Our Pick and Choose model could be for you.**

How does it work?

It's simple. Log in to our Librarian Portal, search for individual eBooks from our collection (now approaching 1,300 titles) and pick the ones you want. You can browse our books by title, ISBN, subject, series, year and by using the A-Z listing. All you need to do is ensure the total value of your suite adds up to at least £1,000/\$1,500.

The selection page will show the total price of your collection and indicate when the minimum amount has been reached. After that, you can carry on adding as many titles to your set as you need.

Once you have created your package you can either pay for it online via credit card, or request an invoice.

What will you get?

In addition to having a suite of eBooks customised to your institution's needs, you will also have many of the benefits which our librarians with complete collections enjoy:

- Unlimited multi-user access and usage
- Guaranteed perpetual access
- MARC records and comprehensive usage statistics free-of-charge
- Powerful search functionality
- All titles DOI indexed to chapter level

What do I need to do next?

If you do not already have a Librarian account, **please register at www.rsc.org/librarians**. You can then put together your package by selecting the 'Pick and Choose' icon for each of your choices

Be completely independent and create a unique package from thousands of titles - which will you choose? Here's some inspiration:

New Developments in Mass Spectrometry

A suite of professional reference books focusing on novel aspects of instrument and method development, the fundamental underpinning chemistry and physics, and new applications in both established and emerging fields.

Specialist Periodical Report: Synthetic Biology

This new SPR provides the reader with an authoritative digest of the latest developments in this emerging field. Leading researchers draw on the recent literature, from both dedicated journals and broader sources, making this an essential reference to any library supporting this research.

Chemical Information for Chemists: A Primer

Born out of strong relations with our librarian community, this chemical information book is written and edited by expert information specialists in this field. Aimed specifically at practising chemists, it will also serve as a useful guide to new librarians and information specialists who are facing the challenging diversity of chemical literature.

Item Na		Unit Price £74.97 💿	No. of items : 2 Items Total : £599.97 Total Cost (exc VAT) : £1000.0
Book Pt	DF Nanodiamond ISBN: 978-1-84973-639-8 Copyright: 2014	£525.00 📀	Please remember the minimum spend is £1,00 If you sub-total is lower you still be charged this amount before VAT.
